Aaron,

Please find attached a redline strikeout version of the draft notice of proposed rulemaking that includes revisions made thus far in response to additional OMB and interagency review comments, including to revisions to:

1. Clarify the EPA's statutory authority for issuing the FIP;
2. Reflect proposed exemptions to certain requirements for particular equipment or activities that are subject to established EPA standards;
3. Clarify text describing Uinta Basin specific studies relied on in developing the proposed FIP; and
4. Update ozone air quality information for the Uinta Basin with the 2015 design values that have become available since original drafting.

We are still in the process of updating the notice and the RIA based on additional OMB and interagency review comments with:

Ex. 5 - Deliberative Process

The attached version of the notice contains comments or highlighting as placeholders for those sections above that we are still working on revising.

Also attached is a summary of historical ozone measurements in the Uinta Basin illustrating the public health issue we are attempting to address.

Please contact me or Chris Dresser if you have any questions about what is being provided today.
